Manuscript Number: LANDUP-D-21-00659

Population density and the spread of the COVID-19 pandemic: a reproducible research example

Dear Dr Paez,

Thank you for submitting your manuscript to Landscape and Urban Planning. Unfortunately your topic is somewhat peripheral to the aims and scope of our journal. Papers in the journal explicitly advance conceptual, scientific, or applied understanding of landscapes; they link or have explicit implications for linking landscape science with planning or design. Your paper insufficiently addresses those issues. You may have seen similar topics published in our journal in the past, but those papers may have better addressed these issues. I believe another journal may be a better match for your paper.

Consequently, I must reject your paper at this initial stage of review and will not send it out for a full peer review. For your information, because the journal receives a very high number of submissions, we have to reject more than 80% of submissions - making it imperative that we review only papers that fit within journal scope.

This decision is final and there is no option to re-submit your work.

We do appreciate your initial interest in the journal, and I hope to see future submissions from you that better match the journal's scope.

Sincerely,  
Joan Iverson Nassauer  
Co-Editor-in-Chief  
Landscape and Urban Planning
